

HydraX™ 0.5U Unloaded Panel

0.5U 24port Small Form Factor full Panel

HydraX™ slim copper modular data patch panel optimizing valuable installation space within the rack. Doing more with less. Perfecting the Art of Cabling!

Features and Benefits

Compatible with all HydraX™ data modular jacks.

0.5U 19" rack-mountable panel with label cover and holder.

Restraining bar allowing proper cable management, taking away lateral stress from installed cables and preventing kinks in the cables. Effectively maintaining the reliability of the cabling system.

Rack space freed can be re-deployed for equipment installation or increasing cable ports with additional 0.5U panels. Well suited for high to ultra density cabling.

Even in compact form, all 24 ports comes with sequential numbering placement for ease with management and identification. Panel for shielding cabling system available.

Characteristics & Properties

Front Panel	ABS
Number of Ports	24 ports
Panel Body	SPCC 1.5mm thickness
Cable Management	SPCC 1.5mm thickness
Color of Panel	Black RAL 9005
Ground Wire	18AWG for shielded panel only
